

The following enhancements have been made to your NGI system.

If you have any questions or comments, please feel free to call us at (972) 747-1983, extension 112.

## **Deals**

- This release is introducing **Deals**, a new feature in NGI.
- Deals are defined as *Date-Effective Rates by Point for a Transaction Type*
- Click on **Contract Mgmt** → **Deals**

- When nominating, Deals are looked up when looking up rates. Instead of simply picking up the rate from the Contract, the rate may come from a Deal.
- If entering multi-day Nominations, rates are now looked up on a day-by-day basis so Nominations can span many Deals.

- On a Contract, the Allow Transaction now has a "Deals Only" option.
  - You no longer are required to turn On/Off a Transaction Type to allow temporary Nominations. Just set it to "Deals Only" and you don't have to touch the contract again (see below).
  - If a Transaction Type is Deals Only and a Nomination is attempting to be entered on a day without a Deal, the nomination will not go through.
- To see all Deals tied to a Contract, just go to the Contract and see the Deals Information box (see below).

## **Facility MDQ new name**

- "Facility MDQ" has been renamed to "Total Contract MDQ". This was a point of confusion in the system.
